a. guideline b. principle c. memory d. belonging
10. Our elders have been brought up with a specific set of, values and principles.
a. vases b. functions c. signals d. morals
11. The first English dictionary wasnearly 700 years ago.
a. achieved b. compiled c. informed d. recommended
12. Many people who get older use aglass to read newspapers, for it makes the words larger.
a. magnifying b. elementary c. bilingual d. hardworking
13. If I asked you about a good English dictionary, what would you?
a. collect b. define c. recommend d. suppose
14. Many dictionaryfor words contain good example sentences.
a. tenses b. entries c. parts d. issues
15. Do you know that PCpersonal computer?
a. figures out b. stands for c. works out d. jumps into
16. The numbers 2 & 3 can make twonamely 23 and 32 if they are not repeated.
a. combinations b. introductions c. applications d. positions
17. The teacher told the students tothe chairs around his desk.
a. regard b. arrange c. combine d. improve
18. Shahnameh of Ferdowsi which has been written nearly 1000 years ago is a valuableof Persian language.
a. treasure b. process c. arrangement d. expression
19. A hearing device helps people who arefrom hearing loss.
a. converting b. expecting c. generating d. suffering
20. Whatwould you like to have if you had superhuman power?
a. productions b. guidelines c. matters d. abilities
21. Each year, solutions to many problemsby scientists all around the world.

- a. found b. find c. are found d. have been found
22. The womanyou met at the train station yesterday is my mother's friend.
- a. which b. whose c. whom d. where

B. Cloze passage

Elders have a lot to share with us: their life experiences, their failures and23..... and many more. Thus we need to care24.....them because they25.....to be cared for. Respect and care for26.....start with our parents as they are our first teachers in our life.

23. a. types b. processes c. successes d. elements
24. a. of b. to c. in d. for
25. a. deserve b. lower c. expand d. carry
26. a. ideas b. devices c. elders d. orders

C. Reading Comprehension

Bacteria are extremely small living things. While we measure our own sizes in inches or centimeters, bacterial size is measured in microns. One micron is a thousandth of a millimeter a pinhead is about a millimeter across. Rod shaped bacteria are usually from two to four microns long, while rounded ones are generally one micron in diameter. Thus if you enlarged a founded bacterium a thousand times, it would be just about the size of a pinhead. An adult human magnified by the same amount would be over a mile (1.6 kilometers) tall.

From the bacterial point of view, the world is a very different place from what it is to humans To a bacterium water is as thick as molasses is to us. Bacteria are so small that they are influenced by the movements of the chemical molecules around them. Bacteria under the microscope, even those with no flagella, often jump about in the water. This is because they crash with the water molecules and are pushed this way and that. Molecules move so rapidly that within a tenth of a second the molecules around a bacterium have all been replaced by new ones even bacteria without flagella are thus constantly exposed to a changing environment.

27. Which of the following is the main topic of the passage?
- a. The characteristics of bacteria b. How bacteria reproduce
- c. The various functions of bacteria d. How bacteria contribute to disease
28. Bacteria are measured in.....
- a. inches b. centimeters c. microns d. millimeters
29. Which of the following is the smallest?
- a. A pinhead b. A rounded bacterium
- c. A microscope d. A rod-shaped bacterium
30. In paragraph 2, the author compares water to molasses, in order to introduce which of the following topics?
- a. The bacterial content of different liquids
- b. What happens when bacteria are added to molasses
- c. The molecular structures of different chemicals
- d. How difficult it is for bacteria to move through water
